SUMMARY

Software Engineer with experience spanning frontend development and cloud infrastructure. Proven ability to build scalable React applications, optimize user workflows, and collaborate across DevOps and cloud teams to deliver reliable, high-performance systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL

Frameworks & Tools: React, Next.js, Node.js, ASP.NET, AWS, Kubernetes, CI/CD, Git

Databases & Testing: PostgreSQL, SQL Server, Jest

EXPERIENCE

Frontend Developer

Credit One Bank

March 2024 - August 2025

Las Vegas, NV

- Built and maintained a React + TypeScript CRM application utilized by ~200 call center agents daily, improving workflow efficiency and usability across daily operations
- Implemented an Electron-based integration with telephony systems to automatically surface customer account data on incoming calls, reducing call time by an average of 15 seconds
- Developed and optimized 20+ dynamic agent workflows, enhancing performance and reducing friction in high-volume customer interactions
- Wrote and maintained comprehensive unit tests using Jest, achieving and sustaining 90%+ test coverage
- Refactored frontend data architecture to improve scalability and maintainability of complex state-driven components

Infrastructure Architect

Credit One Bank

July 2023 - March 2024

Las Vegas, NV

- Contributed to the design and rollout of a Blue/Green deployment strategy, reducing downtime of customer-facing applications by 35% and improving deployment reliability
- Supported implementation of AWS-based systems, Kubernetes containerization, and CI/CD pipelines to improve deployment reliability and speed
- Collaborated with development, cloud, and networking teams to design and approve scalable infrastructure solutions

Full Stack Developer

One Nevada Credit Union

April 2021 - May 2022

Las Vegas, NV

- Developed internal dashboards using C#, ASP.NET, and SQL Server to support executive decision-making and business analytics
- Modernized legacy UI by migrating from static HTML to a React-based frontend, improving usability and internal adoption
- Designed and optimized database structures to support marketing campaigns and reporting systems

EDUCATION

University of Nevada, Las Vegas

Bachelor in Computer Science, Minor Business Administration

Graduated May 2023
